

Selected Package

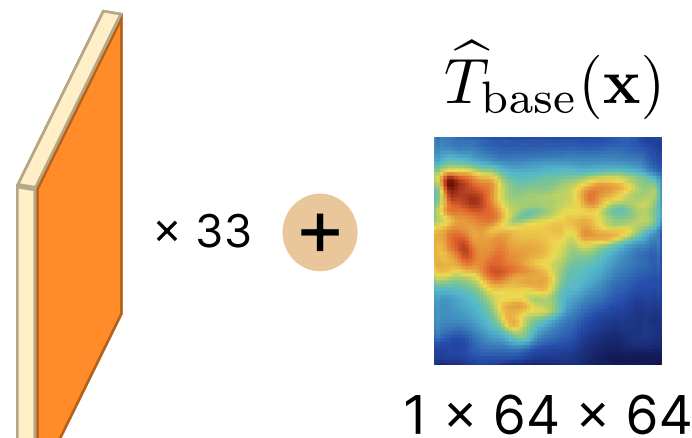

A. Inputs

B. Source-Superposition Baseline

C. Residual Inputs

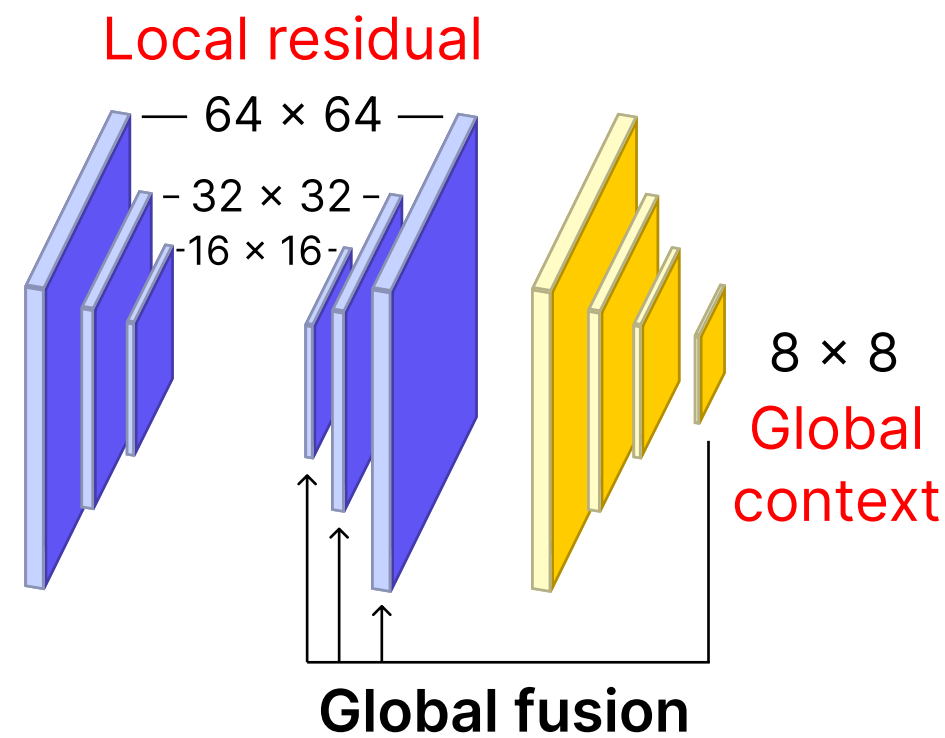

15-D metadata

MLP encoder

D. Global/Local Residual CNN

E. Outputs and Reconstruction

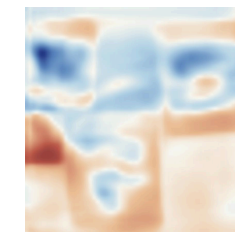

a) effective resistance correction

$$\hat{\Delta R}_{\text{eff}} \times P_{\text{tot}}$$

(scalar)

b) centered spatial residual

$$\hat{S}_0(\mathbf{x}) \text{ mean} = 0$$

$$\hat{T}(\mathbf{x}) = \hat{T}_{\text{base}}(\mathbf{x}) + P_{\text{tot}} \hat{\Delta R}_{\text{eff}} + \hat{S}_0(\mathbf{x})$$

+

Corrected package temperature
